high noon Miss Mildred Strode, daughter of the late Professor H. A. Strode and sister of State Senator A. E. Strode, became the bride of Lieutenant Alexander Archer Vandergrift at "Kemora," the home of the bride at Amherst, Va. The Rev. H. B. The spacious house was artistically arranged in the military colors, white and gold, and ferns, trailing vines and masses of daisies were used throughout the entire lower floor. The bride, who entered the drawing room on the arm of her brother, A. E. Strode, wore an exquisite gown of hand-embroidered chiffon, built over white satin and trimmed in pearls. CHAIRMAN MILLS GETS LOWER RATE

Makes Dealers Reduce Price on Aluminum Sulphate for Southside.

From what appeared to be a most reliable source, The Times-Dispatch learned several days ago that the South Richmond Water Department, which was buying aluminum sulphate in the open market, was getting it at a much lower figure delivered than Richmond, which bought under contract. The report, as it came to this newspaper, was presented to Chairman Morgan R. Mills, of the Council Committee on Water, for what it might be worth, and he immediately set to work to make an investigation of his own. But the boat appeared to be on the other foot, the records showing that Richmond was buying its product, delivered, at a price 10 per cent. less than that paid by the former city of Manchester.

Aluminum sulphate is bought for the settled last in Philadelphia at \$1 per 100 pounds f. o. b. The water rate from Philadelphia to Richmond is 11 cents, the local rate to Cora, a small station on the Chesapeake and Ohio Railway near the basin, being 3 cents, making the price delivered \$1.14. "Manchester," on the other hand, had been buying in Philadelphia at \$1.10, f. o. b., the freight rate of 11 cents added making the price delivered \$1.21. Now South Richmond buys for \$1, its freight rate being 11 cents.

Price Cuts Reduction.—"When I got the facts," said Chairman Mills yesterday, "I immediately notified the Philadelphia dealers that Richmond had absorbed Manchester's supplies for its Water Department, and that we expected aluminum sulphate to be delivered to us for our new territory at the contract price, which was \$1. I could not understand in the first place how Richmond was paying more than the Southside, yet I went to work with that assumption after hearing the street reports. But as you see, we were paying less, and on the information, or rather upon the current reports, presented to me as chairman of the Water Committee by The Times-Dispatch, we were able to cut the South Richmond sale price in Philadelphia down from \$1.21 to \$1."
